Amend C.S.S.B. 1380 by deleting Section 3 and adding the following:

SECTION 3. ENERGY EFFICIENCY PROGRAMS. The commission shall designate for a utility one or more of the following energy efficiency programs:

(1) a weatherization and retrofit program that includes:

(A) an energy assessment procedure for determining the cost effectiveness of weatherization or retrofitting of existing residential and commercial structures using the state plan developed by the Texas Energy and Natural Resources Advisory Council, or its successor;

(B) a clearly stated plan that encourages residential and commercial customers of the utility to make repairs and improvements to residence and business structures to prevent loss of energy; and

(C) a clearly stated plan that encourages low income residential customers of the utility to make repairs and improvements to residences to prevent loss of energy; and

(D) limits on the utility's role in financing repair and improvement to acting as a service agent as defined by the state energy plan developed by the council for the residential conservation service program;

(2) an energy efficiency in new dwellings program that includes:

(A) an energy assessment procedure for determining the cost effectiveness of new construction standards that will be appropriate for the utility's service area; and

(B) a clearly stated plan that encourages the builders of residential and commercial structures to adopt procedures appropriate for the specific utility's service area;

(3) a renewable energy devices program that includes:

(A) an assessment by the utility of the feasibility of adopting programs that utilize renewable energy sources and devices available to the utility and that estimates the cost effectiveness of using those proposed devices;

(B) the use of renewable energy sources including wind energy, solar energy, and biomass energy that employs bioconversion devices; and

(c) a goal that requires at least five percent of residential electricity consumption to be supplied by renewable energy by January 1, 1990, and periodically thereafter as determined by the Commission, where the energy incentive is doubled for savings resulting from renewable energy usage exceeding the Commission adopted goal;

(4) a load management program that included load management techniques such as demand subscription rates, remote control thermostats, cool storage, cycling of air conditioners, and other interruptible service options;

(5) a productivity of base load generating capacity program that includes power plant performance improvement programs measured in terms of forced outage or other acceptable performance indicators that are determined appropriate by the commission for the utility's mix of base load generations;

(6) an energy brokerage program that provides for the dispatch of electrical power from one utility to another utility within the state, including the wheeling of power through an intermediate utility. The seller, purchaser and transporter shall each share in incentive in proportional amounts determined by the Commission;

(7) an industrial cogeneration program that encourages the increased production of electricity generated through cost-effective cogeneration; and

(8) any superlative administrative, organizational or operational improvement program not included under options (1) through (7).

The amendment was read and was adopted.

On motion of Senator Parmer and by unanimous consent, the caption was amended to conform to the body of the bill as amended.
